Design user-friendly Streamlit interface

Slide 1 – User-Friendly Streamlit Interface

Legal Ease: AI-Powered Legal Document Generator

- Build a simple and easy-to-use Streamlit interface.
- Provide all required input fields.
- Add a clear project title and logo.
- Organize the interface for better user experience.
- Make document generation simple and accessible.

Slide 2 – Application Title & Logo

Header Design

- Display the **Legal Ease** project name at the top.
- Add the application logo.
- Provide a short description of the application.
- Use a clean and professional layout.
- Keep the important information clearly visible.

Example:

 Legal Ease
AI-Powered Legal Document Generator

Slide 3 – Document Type Input

Select Document Type

- Provide a dropdown menu for document selection.
- Examples:
    - Rental Agreement
    - Employment Agreement
    - Non-Disclosure Agreement
    - Service Agreement
- Make document selection simple and clear.

Slide 4 – Required Input Fields

Collect User Information

The interface includes fields for:

- **Parties** – Names/details of involved parties.
- **Terms** – Important conditions and requirements.
- **Dates** – Start date, end date, or other relevant dates.
- **Document Type** – Type of legal document required.
- Use text areas and input boxes according to the data type.

Slide 5 – Responsive Layout

Clean & Responsive Design

- Organize inputs into logical sections.
- Use columns where appropriate.
- Provide clear labels and instructions.
- Keep buttons easy to find.
- Ensure the interface works comfortably on different screen sizes.
- Display errors and validation messages clearly

Slide 6 – Complete Interface Workflow

stream lit UI Workflow

1. Display **Legal Ease** title and logo.
2. Select the document type.
3. Enter parties' details.
4. Enter terms and dates.
5. Click **Generate Document**.
6. Display the generated legal document.
