Dynamic document generation preview

Slide 1 – Dynamic Document Generation Preview

Legal Ease: AI-Powered Legal Document Generator

- Display the generated legal document instantly.
- Provide a clear preview of the document.
- Allow users to review the generated content.
- Make the output easy to edit and export.
- Improve the overall user experience.

Slide 2 – Styled Document Output

Show Styled Editable Output

- Display the generated document with proper formatting.
- Use headings, paragraphs, and spacing.
- Present the content in a professional document style.
- Allow users to make necessary changes.
- Keep the document easy to read and understand.

Slide 3 – Dynamic Preview

Real-Time Document Preview

- Generate the document based on user inputs.
- Update the preview after generation or editing.
- Show the latest version of the document.
- Allow users to check details before exporting.
- Reduce errors before final download.

Slide 4 – Edit & Review

Editable Document

- Users can review the generated text.
- Make corrections or modifications.

- Update names, terms, and dates if required.
- Preview the final version before downloading.
- Ensure the document contains the required information.

Slide 5 – Export Options

Download Generated Document

Provide multiple export formats:

- **`.txt`** – Simple text file
- **`.docx`** – Editable Microsoft Word document
- **`.pdf`** – Professional document for sharing/printing

Export Flow:

```
Generate → Preview → Edit → Select Format → Download
```

Slide 6 – Complete Workflow

Dynamic Document Generation Workflow

1. User enters document requirements.
2. Gemini generates the legal document.
3. Streamlit displays a styled preview.
4. User reviews and edits the content.
5. User selects `.txt`, `.docx`, or `.pdf`.
6. Final document is exported and downloaded.
